

Content Filtering

boosting your business'
efficiency is this easy...

As a small business you know you are losing productivity when employees shop and browse social networks on company time.

AVG Content Filtering allows you to increase productivity with advanced, real-time content filtering and the ability to block access to the websites that drain time and money from your business:

Drive Productivity

AVG Content Filtering helps your business drive productivity by limiting access to social networking, searching and shopping to approved times.

And, because less bandwidth is absorbed by personal use, that means more speed for business tasks.

Save time & money

Helping boost your business' productivity involves no start-up costs as no new hardware or network changes are required.

It's quick and easy to do with out-of-the-box templates for quick and automatic policy setting.

Stay informed & in control

Know what's happening on every device at all times with instant alerts by email or SMS. Set flexible policies for in the office, at home or on the road and allow access to employees to specific sites.

With real-time policy updates to devices, management of this service couldn't be simpler.

Protect against Threats

AVG Content Filtering prevents users from bringing security risks into the business by automatically stopping access to sites known to deliver spyware, malware and other threats.

It also lets you automatically block sites by category with over 60 million sites sorted into subgroups and use flexible Block/Warn Only/ Allow options to control the risk.

AVG Content Filtering

How it works

IT
Concept

Fast, efficient and easy

AVG Content Filtering with patented V-routing technology is fast, flexible and highly accurate. Fully integrated with end-point security, our very thin client architecture keeps mobile and remote office workers productive wherever they are.

Features

Simple and free to set up, AVG Content Filtering is the fast, flexible and highly accurate way to help your business boost productivity.

Secondary local passwords

Create a secondary, local password to override blocked pages without compromising the administrative password.

Out-of-the-box templates

Use out-of-the-box templates for quick and automatic policy setting and set flexible policies for in the office, at home or on the road.

Email and text alerts

Know what's happening on every device, at all times with instant alerts by email or text message.

Automatic site blocking

Automatically block sites by category – over 60 million sites sorted into subgroups for increased granularity. Use flexible Block /Warn Only/ Allow options for employee access to specific sites.

AVG CloudCare™ Architecture

- SSL 2048-bit encryption in transit
- Multiple-layer firewalls with SPI
- Private Cloud, fully redundant data centres
- Secure user password enforcement
- Compatible with existing firewalls
- Compatible across all browsers

End-points supported
